Fadjar Irfan Rafi

Fullstack Developer

Yogyakarta, Indonesia | +62 812-1480-0546 | irfanrafi021@gmail.com | fadjarrafi.my.id

SUMMARY

Fullstack Developer with 3+ years of experience building web applications across e-commerce, content management, and internal business systems. Currently maintains seven production systems for a retail group, including an HRIS, an ERP, and an e-learning platform, built on PHP (CodeIgniter) and MariaDB. Experienced with Laravel, Vue.js, and React, payment gateway and REST API integration, and securing and documenting APIs. Also built an AI summarisation service on FastAPI with vector search (Qdrant) and LLM integration. Comfortable owning features end to end, from database design and backend logic to UI and deployment.

WORK EXPERIENCE

PT. Qhome Sukses Abadi Feb 2026 – Current

Fullstack Developer

- Maintain and extend seven internal production systems for a retail group (HRIS, ERP, e-learning platform, asset management, supplier portal, and inventory) on CodeIgniter 2, 3, and 4.
- Built a document-archive module from scratch in the asset management system: seven request types, multi-tier approval, HRIS-sourced digital signatures, PDF forms, Excel reports, and a warehouse box register with transfer history.
- Added batch and multi-level leave approval to the HRIS mobile API, and stopped duplicate clock-ins with row-level locking and deadlock retries.
- Hardened the HRIS API by centralising API-key checks, removing hardcoded keys, and parameterising queries vulnerable to SQL injection.
- Built the LMS video pipeline: chunked uploads, server-side FFmpeg compression via cron, and signed-token streaming shared between the web app and its REST API, documented with OpenAPI/Swagger.
- Tech Stack: CodeIgniter, PHP, MariaDB, Node.js (Socket.io), Firebase Cloud Messaging, FFmpeg, Bash, OpenAPI.

Square Indonesia Jul 2023 – Jul 2025

Web Programmer (Project-based)

- Built and shipped Mawar Florist, a client-facing e-commerce site (mawarfloristjogja.com), with Laravel and Vue.js on MariaDB, integrating Xendit for payments including checkout flow and webhook-based transaction status handling.
- Developed Odo Dental Indonesia (ododentalindonesia.com), a company profile and blog platform for a dental clinic, using Laravel, React, and MariaDB.
- Worked directly with clients to scope requirements, triage site issues, and prioritise fixes.
- Tech Stack: Laravel, Vue.js, React, MariaDB, Xendit, TailwindCSS.

PT. Saranainsan Mudaselaras Jan 2023 – Jan 2025

Fullstack Developer

- Designed and built a Content Management System (CMS) allowing hotel staff and administrators to manage and update IPTV content, schedules, and user settings in real time.
- Integrated APIs for seamless communication between the Android application, the CMS, and the company's backend infrastructure, ensuring real-time updates and data synchronisation.
- Maintained and optimised internal systems, including network monitoring tools, ensuring reliable service delivery across both internal operations and customer-facing products.
- Tech Stack: Laravel, MariaDB, Python.

FREELANCE & INTERNSHIP

PT. Informatika Media Pratama Sep 2025 – Dec 2025
Fullstack Developer (Freelance) Kalimalang, East Jakarta

- Built an AI summarisation service for an existing LMS, generating condensed summaries of learning modules to reduce learner time-to-comprehension.
- Developed the FastAPI backend exposing REST endpoints for on-demand and batch summary generation.
- Implemented a Qdrant-based retrieval pipeline (vector storage and semantic search over chunked content), feeding relevant context to DeepSeek for LLM summarisation.
- Tech Stack: FastAPI, Python, Qdrant, DeepSeek.

PT. Rimba Ananta Vikasa Feb 2023 – May 2023
Web Programmer (Freelance) Kebayoran Baru, South Jakarta

- Collaborated with UI designers to implement redesigned mockups into frontend code.
- Enhanced user satisfaction by revamping user flows implemented in backend code, resulting in a 15% increase in usability.
- Conducted debugging and testing of deployed websites, ensuring optimal performance.
- Tech Stack: Laravel, MariaDB, Bootstrap.

EDUCATION

University of Amikom Yogyakarta 2018 – 2022
Computer Science

- GPA: 3.65 / 4.00
- Thesis: *Analysis of Activation Functions in BiLSTM for Text-Based Emotion Recognition*

ACHIEVEMENTS

- DevOps and Back-End Developer Scholarship Program — AWS 2023
- Fresh Graduate Academy Scholarship Program — Digitalent Kominfo 2023
- Graduated with distinction (Cum Laude) — University of Amikom Yogyakarta 2022
- Back-End Dev IDCamp Scholarship Program — Indosat Ooredoo Hutchison 2022

ACTIVITIES

- Participant, Ace Your Career Expedition Internship Program — Talent Growth 2023
- Participant, Dicoding Developer Conferences — Dicoding Indonesia 2023
- Committee, Penggalian Potensi Mahasiswa — University of Amikom Yogyakarta 2019, 2022

SKILLS

Hard Skills: MySQL, PostgreSQL, Laravel, Git, API, Postman, cPanel, phpMyAdmin, Figma, MS Office.

Soft Skills: Communication, Adaptability, Teamwork, Decision Making, Critical Thinking, Problem Solving.

Languages: Indonesian (native), English (professional working proficiency).
